

RYGERYGEN

VIBRATING OVERSEEDER

The RYGEN is a one pass tool which aerates, seeds (or fertilizes), levels and compacts the soil to improve seed germination. It is easy to use several simultaneous operations allowing you to save time and fuel costs, while offering superb results. The machine is equipped with 4 aerator rotors powered by the tractor PTO; it's vibrating rotors allow the implement to overseed with minimum existing turf.

Standard equipment TRACTOR :Universal three point hitch, cat. I and II • Rear roller • «EC» safety guards
Front levelling bar - seeder
