

ZIP POWER HARROWS

The **ZIP** model harrow has been designed for small farms and for tilling soil in specialized cultivations such as market gardening and viticulture. The special attention given to its overall dimensions and lightness makes it an ideal implement for low HP tractors. The special design of the blades allows the soil to be broken up with considerable economy in tractor power use.

Standard equipment TRACTOR : Universal three point hitch, cat. I and II • Rear roller central adjustment • 2 blades per rotor • «EC» safety guards Front levelling bar

Standard equipment TWO WHEELS TRACTOR : : rear roller in expanded metal - levelling bar - depth adjustment through screw

Optionals: Grass seeder - connections to different brands and models of two-wheel-tractors
